

Purpose of Foundation

Korea Childcare Promotion Institute(KCPI) was established as a non-profit foundation corporation under Article 32 of the Civil Act for the purpose of improving the quality of childcare services and contributing to the happier lives of babies, children, parents and childcare staff by conducting effective childcare-related projects.

Mission & Vision

Mission

To advance childcare by improving the quality of childcare services

Vision

To play a leading role in the childcare industry, contributing to the healthy development of children and happiness of parents

Core Values

Accountability and reliability

Communication and cooperation

Change and leadership

To lead the way in the management of childcare service quality

To strengthen the capability of childcare staff

Strategic Goals

To conduct childcare support projects focusing on those who need childcare services

To strengthen the capability of the organization and make it more dynamic

Introduction of Business

Accreditation of childcare Centers

“We provide reasonable criteria on selecting childcare centers.”

KCPI conducts accreditation. The accreditation system ensures that childcare centers wishing to apply for accreditation undergo inspections and improve their current status based on the accreditation indicators. Accreditation is provided by conducting evaluations in a fair manner.

Qualification Management of Childcare Staff

“We improve the capabilities of childcare staff through on-the-job training.”

KCPI conducts certification and issues certificates for Directors of childcare centers, childcare staff and childcare staff for special needs babies and children. By doing so, we are improving the efficiency and transparency of qualification management for childcare staff and strengthening the expertise of childcare staff.

In addition, customized training and support projects are underway for each specific area to increase the expertise and competency of childcare staff.

Quality Control of Public Type childcare Centers

“We make a public type childcare center that is supported by the nation and trusted by parents.”

KCPI provides a range of support to improve the expertise of childcare staff and for the systematic operation of childcare centers by selecting excellent private childcare centers and ensuring that they function as excellent childcare facilities.

Time-based Childcare Service

“We provide a customized childcare service, which is safe and reliable.”

KCPI contributes to the increase in the number of users and satisfaction of service users by conducting training for childcare staff and monitoring for the stable operation of time-based childcare services.

Operation of Dream Start Project Support Group

“We support all children to realize their dreams.”

KCPI consigns the Dream Start Project Support Group to places where there are vulnerable groups. They will then support the healthy growth and development of such vulnerable groups. The project is intended to provide a customized and integrated service in the fields of health, childcare (education) and welfare to children from vulnerable groups so that they too can develop their potential capability and be given a fair opportunity.

Operation of Central Support Center for Childcare

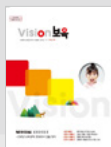

“We strive to strengthen the childcare project information delivery system.”

KCPI consigns the Central support center for childcare that is an umbrella organization for all support centers for childcare across the nation. The Central support center for childcare improves convenience for childcare service users by providing general information and consulting services on childcare and improves the operation of childcare centers while playing a central role among centers across the nation by establishing a network of childcare centers.

Promotion and Establishment of Network

KCPI provides a range of information on childcare to support the efficient execution of childcare policies and play a bridging role between the places where childcare is provided and the government.

* It is possible to subscribe at the KCPI website for free

Vision childcare

- A magazine that introduces childcare policies and up-to-date news.

e-Vision Childcare

- A online newsletter that introduce KCPI's latest issues and events.

Childcare Network

- Various events such as lectures, conferences, forums and parental education for people who are interested in childcare.

KCPI

*A world where children,
parents, and caregivers
are happy*
